Overview

Professional Soil Cultivation Solution

This heavy-duty rotary tiller is engineered for high-performance soil preparation and seedbed creation. Featuring a robust steel frame and an efficient PTO-driven gearbox, it effectively churns and mixes soil to improve structure, aeration, and drainage. The adjustable design and standard three-point hitch ensure versatile application across various farming environments and tractor setups.

Technical Specifications

Adjustable Features

- Tilling depth control
- Variable settings for different soil types

Drive System

PTO-driven with central gearbox

Hitch Type

Three-point hitch

Construction & Quality

Maintenance

Grease fittings included • Easy access maintenance

Build Materials

High-strength steel, Corrosion-resistant finish, Reinforced frame
