Product Overview

Professional Agricultural Rotary Tiller

This robust rotary tiller is a versatile agricultural solution designed for efficient soil preparation and cultivation. Featuring a series of high-durability blades mounted on a rotating shaft, the machine excels at breaking up compacted earth, aerating soil, and preparing high-quality seedbeds. With multiple working width options available, it offers compatibility across various farming needs and tractor models to enhance overall soil health and crop productivity.

Technical Specifications

Working Widths

- 100
- 120
- 140
- 160
- 180
- 200
- 220
- 240

Required Maintenance

Gear oil lubrication required before use

Primary Applications

Soil Cultivation, Seedbed Preparation, Fertilizer Incorporation, Weed Control
