

# Agricultural Rotary Tiller

This product is for hard work and site preparation types of agricultural machinery, mainly for dry land, paddy field of rotary operation.

## Product Overview

### Versatile Rotary Tiller for Professional Agriculture

This diesel-powered rotary tiller is designed for high-performance site preparation in both dry land and paddy fields. Featuring an all-gear drive system, the machine minimizes power loss while ensuring excellent soil tillage results across various terrain types. With its compact structure and ductile iron gearbox, it offers high durability, simple maintenance, and the flexibility to support additional agricultural operations like pumping and spraying.

## Technical Specifications

Tillage Width	1350 mm
Tillage Depth	100 mm
Weight	132 kg

## Performance

### Productivity

**50 ha/h**

Productivity Rate

### Suitable Environments

Dry Land, Paddy Fields, Orchards, Vegetable Plots, Tea Gardens, Tobacco Growing Areas

## Features

### Engine and Build

- Diesel power source
- All-gear drive system
- Ductile iron gearbox for high intensity
- Wet-method friction plate clutch
- Compact and reliable design

### Compatible Operations

- Pumping
- Power generation
- Spraying
- Trenching
- Short-distance transport
