

Agricultural Spray Machine with Dual Hose Reels

This agricultural spray machine is designed for efficient spraying applications. It features a durable steel frame, dual hose reels, and a powerful pump for consistent pressure and optimal spray distribution.

Product Overview

Professional Agricultural Spraying

The CAZ-30 series spray machine is a robust and versatile agricultural tool designed for efficient and effective spraying applications in demanding field conditions. Built with a heavy-duty steel frame, it offers exceptional stability and longevity for tasks ranging from pesticide application to fertilization. The system is engineered for ease of use, featuring integrated wheels for maneuverability and precision controls for consistent spray distribution.

Key Features

Core Attributes

Heavy-duty steel frame, Dual hose reels, Adjustable pressure, Integrated transport wheels

Technical Metrics

Performance Metrics

2 reels

Hose Capacity

Applications

Suitable Applications

- Pesticide application
- Fertilization
- Weed control

Control Systems

System Components

Pressure Gauges • Control Valves • High-Pressure Hoses
