Product Overview

Comprehensive Agricultural Spraying Components

This versatile sprayer kit provides essential components for maintenance and assembly of boom and orchard sprayers. Constructed from durable, chemical-resistant materials, these parts ensure reliable operation during the application of fertilizers, herbicides, and pesticides. The kit includes critical hardware such as regulators, filters, pumps, and specialized nozzle assemblies designed for secure, leak-proof performance.

Technical Specifications

Application Compatibility

- Boom Sprayers
- Orchard Spraying Systems
- Irrigation Integration

Included Components

Regulators, Filters, Pumps, Spray Guns, Nozzle Assemblies, Tank Lids, Fittings

Material Composition

High-density polyethylene (HDPE) and reinforced industrial-grade plastics

Nozzle & Clamp Assembly

Nozzle Performance

Quick-release design • Adjustable clamp mechanism • Chemical resistant

Tank & Plumbing Hardware

Plumbing Configurations

90-degree elbow fittings with ribbed hose connections

Tank Lid Design

HDPE lid with central handle for airtight, leak-proof sealing
