

Agricultural Tractor

This agricultural tractor is engineered for efficient farming operations. It delivers the necessary power and versatility for plowing, planting, and harvesting.

Overview

High-Efficiency Solar Water Heating System

This advanced solar water heating system utilizes high-performance vacuum tube technology designed for optimal heat absorption and thermal efficiency. The unit is constructed with a durable galvanized steel frame and a premium stainless steel inner tank for food-grade safety and longevity. It is available in various configurations to suit different capacity requirements, making it an ideal choice for professional-grade hot water solutions.

Technical Specifications

Vacuum Tube Dimensions	158x1800
Inner Tank Material	SS304-2B food-grade stainless steel
Support Frame Material	Galvanized steel (1.5mm thickness)

Model Variants

Model Specifications

Model	Collector Area (m ²)	Tank Capacity (L)
WK-JG-1.8M/15	1.88	121/166
WK-JG-1.8M/18	2.26	145/200
WK-JG-1.8M/20	2.52	160/220
WK-JG-1.8M/24	3.04	190/262
WK-JG-1.8M/30	3.8	236/326

Features

Key Features	Vacuum Tube Technology, Food-Grade Inner Tank, Galvanized Steel Frame, High Thermal Efficiency
