Overview

Professional Agricultural Machinery Set

This comprehensive set includes both heavy-duty tractors and high-efficiency combine harvesters designed for modern farming operations. Built for versatility, these machines handle essential tasks ranging from plowing and tilling to large-scale crop harvesting. With a focus on power, stability, and operator comfort, this equipment is engineered to maximize productivity and reliability in diverse field conditions.

Tractor Specifications

Key Tractor Features

- Heavy-duty tires for superior traction
- Enclosed operator cabin
- Robust construction for heavy-duty tasks
- Optimized for plowing, tilling, and planting

Available Tractor Models

Red Utility Tractor, Blue Utility Tractor

Combine Harvester Specifications

Primary Functions

- Reaping
- Threshing
- Winnowing
- Grain Separation

Design Highlights

- Large front header with reel
- Integrated cutting mechanism
- Operator cabin with climate/control environment
- Advanced cleaning system

Harvester Configurations

Tracked Undercarriage Model, Wheeled Model
