

# Agricultural Tractor for Farming

This agricultural tractor is a robust and reliable machine designed for various farming tasks. It features a powerful engine providing ample torque for plowing, tilling, and hauling.

## Product Overview

### Versatile Agricultural Power

This series of 4WD agricultural tractors provides a robust and reliable solution for diverse farming tasks ranging from plowing and tilling to transport. Designed with a vertical, water-cooled diesel engine and a 3-point hydraulic suspension system, these units offer high torque and efficient implement control. The compact footprint and tight turning radius ensure excellent maneuverability in confined farm spaces.

## Technical Specifications

### Model Range Data

Model	Rated Power (kW)	Structure Weight (kg)	Traction Force (kN)
XT254	18.4	1200	6.2
XT404	29.4	1200	9.4
XT454	33.1	1330	10.5
XT504	36.8	2030	13
XT604	44.1	2100	14.7

Drive System: 4x4 WD

Min. Turning Radius: 4.8 m

## Engine Performance

### Engine Metrics

**44.1 kW**

Max Power

**250 g/kW\*h**

Max Fuel Consumption

**2400 rpm**

Rated Speed

## Hydraulics and PTO

### PTO Shaft

- Dependent
- Clockwise rotation
- 6 Spline
- 35mm Diameter
- 540 rpm

Hydraulic Suspension: I Category, Rear Mounted, Three Point Suspension
