

# Agricultural Tractor for Farming Operations

This agricultural tractor is a robust and versatile machine designed for various farming tasks. It features a powerful engine and ergonomic cabin for operator comfort.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Agricultural Powerhouse

The TH 2604 tractor is a robust agricultural machine engineered for heavy-duty farming operations. Powered by a high-performance six-cylinder diesel engine with advanced common rail technology, it ensures strong power delivery while maintaining low fuel consumption and environmental compliance. With a user-friendly ergonomic cabin, smart ECU control, and versatile implement connectivity, this tractor is designed to enhance productivity and operator comfort in the field.

## Engine & Power

### Key Performance Metrics

**260 HP**

Horsepower

**350 L**

Fuel Tank Capacity

### Engine Configuration

6-cylinder diesel engine with high-pressure common rail

## Transmission & PTO

### PTO Speed Options

- 540/1000 rpm
- 760/850 rpm
- 760/1000 rpm

### Transmission Gear Shifts

16 Forward + 16 Reverse with synchronizer shuttle shifts

## Hydraulics & Hitch

Lifting System	Double cylinder high-pressure lifter
Three-Point Hitch	Category III (Rear position)
Hydraulic Oil Supply	Independent hydraulic oil supply with separate tank

## Comfort & Cab

Cabin Features	Air Conditioned, Full Overview, Dust Proof, Low Noise, Flat Floor
Steering System	Hydraulic steering
