

Agricultural Tractor for Farming Operations

This agricultural tractor is designed for various farming tasks such as plowing, tilling, and hauling. It features large treaded tires for off-road traction and a high exhaust pipe.

Overview

High-Performance Agricultural Tractor

This robust agricultural tractor is engineered for demanding farming operations including plowing, tilling, and heavy-duty hauling. Featuring a powerful front-mounted engine and specialized high-traction tires, it ensures reliable performance across diverse field conditions. Designed with operator comfort and efficiency in mind, it provides the versatility required for modern agricultural tasks.

Technical Specifications

Model Series	TS454
Drive Configuration	Off-road capable, High-traction

Design and Utility

Operational Features

- Front-mounted engine
- High-visibility headlights
- Ergonomic driver seating
- High-clearance exhaust system

Primary Applications

Plowing • Tilling • Hauling
