

# Agricultural Tractor for Field Work

This tractor is designed for field work and general farm operations. It features a diesel engine, robust tires, and various mechanical components.

## Product Overview

### Versatile Field Performance

The TS250 is a robust agricultural tractor engineered specifically for demanding field work and comprehensive farm operations. Built with a powerful diesel engine and high-traction tires, it delivers the consistent performance required for daily agricultural tasks. Its ergonomic design and mechanical simplicity ensure reliability in various farming environments.

## Technical Specifications

Engine Type	Diesel
Model Designation	TS250

## Features

Intended Use	General Farming • Field Work
Key Design Features	Diesel Engine, Robust Tires, High Exhaust Stack, Field-Ready Construction
