

Agricultural Tractor for Plowing and Towing

The tractor is a versatile and robust machine designed for agricultural and industrial applications. It features a powerful engine, heavy-duty tires for optimal traction and a sturdy frame for durability.

Overview

Robust Agricultural Utility

This versatile and robust tractor is engineered for demanding agricultural and industrial applications, including plowing, tilling, and towing heavy loads. Built with a heavy-duty frame and high-traction tires, it ensures reliable performance in various field conditions. Operators benefit from a design focused on comfort and intuitive control, making it an efficient solution for farmers and construction professionals alike.

Key Performance

Operational Capabilities

400 Series

Load Capacity Class

Application Scope	Plowing, Tilling, Towing
Model	TS400

Construction

Build Features

- Heavy-duty reinforced frame
- High-traction industrial tires
- Ergonomic operator seating
- Intuitive control interface
