

Agricultural Tractor Tire with Ribbed Tread

Agricultural tire designed for tractors and farm equipment, featuring a ribbed tread pattern for enhanced steering and stability in field applications. Constructed with durable rubber compound for long-lasting performance.

Product Overview

High-Performance Agricultural Steering Tire

This agricultural tire is precision-engineered for tractors and heavy-duty farm equipment. Featuring a specialized ribbed tread pattern, it provides superior steering precision and stability across various field conditions. Built with a high-durability rubber compound, it ensures extended service life and consistent performance in demanding agricultural environments.

Technical Specifications

Key Benefits

- Enhanced steering control
- Improved field stability
- Long-lasting rubber compound

Tread Pattern	Ribbed
Primary Application	Tractor, Farm Equipment, Steering
