Product Overview

Designed for Versatility and Efficiency

This agricultural transport tricycle is engineered to provide a reliable and economical solution for heavy-duty goods transport in farms and industrial sites. It features a robust cargo bed design with protective railings to ensure secure transport over various terrains. Combining operator comfort with professional safety features like three-point seatbelts, it is built for long-lasting service in demanding environments.

Technical Specifications

Engine Performance

1 Cylinder

Engine Configuration

Vehicle Layout

- Single front wheel for maneuverability
- Dual rear wheel configuration for stability
- Includes integrated water tank

Design Features

Three-point safety belts, Electrophoretic anti-rust coating, Covered driver cabin, Rear cargo railing system

Operational Benefits

Key Advantages

Feature	Benefit
Engine	Powerful and fuel-efficient
Rear Axle	Mature, independently developed technology
Comfort	Luxurious cabin with improved ergonomics
Safety	Equipped with three-point seatbelts
