

Agricultural Vehicle Axle

This agricultural vehicle axle is designed for optimal load distribution and smooth operation. It features robust construction with a high-strength axle beam and precision-engineered wheel hubs.

Overview

Heavy-Duty Agricultural Axle

This agricultural vehicle axle is engineered for superior performance and durability in demanding field conditions. It features a robust construction with a high-strength axle beam and precision-engineered wheel hubs, ensuring optimal load distribution. Designed for reliability, this component supports a wide range of agricultural vehicles and implements to maintain smooth operation under heavy workloads.

Performance Specifications

Maximum Load Capacity

9000 KG

Max Capacity

Technical Dimensions

Axle Dimensions

Parameter	Value
Truck Length	1900 mm
Axle Tube	80 mm (Square)
Brake Size	300 x 90 mm

Component Details

Bearing Specifications

- 32212
- 32215

Wheel Stud Configuration

8 x M20 x 1.5
