Product Overview

High-Performance Agricultural Water Pump

This centrifugal water pump is expertly engineered for efficient water management in demanding agricultural environments, including irrigation and drainage tasks. Featuring a robust engine and a durable, self-priming design, the unit ensures reliable performance and longevity in the field. The entire system is encased in a sturdy protective roll cage, facilitating easy transport and providing necessary stability during operation.

Technical Specifications

Engine Power

5.5 HP

Power Output

Model Identifier

WP-30

Key Features

Operating Characteristics

- Self-priming functionality for easy operation
- Robust centrifugal pump design
- Protective roll cage for durability
- Portable frame for site mobility

Applications

Irrigation, Drainage, Water Transfer, Dewatering
