

Agricultural Water Pump

This heavy-duty water pump is designed for agricultural and industrial applications. It features a robust cast iron construction for durability and long-lasting performance.

Overview

Professional Agricultural Water Pump

This heavy-duty water pump is engineered to provide reliable performance in demanding agricultural and industrial environments. Constructed from robust cast iron, the unit ensures exceptional durability and longevity for intensive water management tasks. It features a multi-groove pulley system designed for efficient power transmission, making it an ideal solution for large-scale irrigation, drainage, and industrial fluid transfer systems.

Technical Specifications

Construction Material	Cast Iron
Power Transmission	Multi-groove pulley
Port Configuration	Inlet port, Outlet port, Protective caps included

Application Suitability

Primary Uses

- Agricultural irrigation
- Drainage systems
- Industrial water transfer
