

Agricultural Water Pump for Irrigation

This water pump is designed for drainage and irrigation purposes in agricultural settings. It features a robust construction with dual blue pontoons for stability and buoyancy in water.

Product Overview

Professional Agricultural Water Pump

This high-performance water pump is specifically engineered for efficient drainage and irrigation in agricultural environments. Its innovative design incorporates dual blue pontoons to ensure maximum stability and buoyancy when operating on water surfaces. Featuring a robust protective orange housing and a secure intake system, it provides a durable solution for complex water management tasks.

Technical Specifications

Model Identification	TY-Y03-1.5
Application	Drainage, Agricultural Irrigation, Water Management

Design Features

Buoyancy System	Dual blue pontoon configuration
Intake System	Black intake pipe with protective base cage
Mobility	Yes
