

# Agricultural Water Pump for Irrigation

This water pump is designed for agricultural machinery, specifically for drainage and irrigation purposes. It features a durable cast iron construction with multiple ports and a grooved pulley for belt-driven operation.

## Product Overview

### High-Performance Agricultural Irrigation Pump

Designed for demanding agricultural environments, this cast iron water pump provides reliable fluid transfer for irrigation and drainage applications. The unit features a robust construction engineered to withstand consistent daily operation in the field. Equipped with a professional-grade pulley system, it is optimized for seamless integration into belt-driven machinery setups.

## Technical Specifications

### Key Components

- Integrated pulley system
- Multi-port configuration
- Heavy-duty housing

Body Material	Cast Iron
Drive Type	Belt-driven

## Application

Primary Applications	Agricultural Irrigation, Field Drainage, Water Management
