

Agricultural Water Pump for Irrigation

This water pump is designed for efficient fluid circulation in agricultural machinery. It features a durable cast iron housing for corrosion resistance and long-lasting performance.

Product Overview

High-Performance Agricultural Water Pump

This durable water pump is engineered for efficient fluid circulation in demanding agricultural environments. Built with a robust cast iron housing, it provides excellent resistance against corrosion to ensure long-term reliability. Its precision-engineered impeller and pulley system work in tandem to deliver optimal water flow and pressure for irrigation and drainage tasks.

Technical Specifications

Core Components

- Precision-engineered impeller
- High-efficiency pulley system
- Corrosion-resistant housing

Body Material	Cast Iron
Applications	Irrigation, Drainage, Fluid Circulation
