

Agricultural Water Pump for Irrigation

This water pump is designed for efficient water transfer in agricultural and irrigation applications. Featuring a robust construction and optimized impeller design, this pump delivers reliable performance and high flow rates.

Product Overview

Professional Agricultural Water Pump

The BM103 water pump is engineered specifically for high-efficiency water transfer in demanding agricultural and irrigation environments. Featuring robust construction and a precision-optimized impeller design, this pump provides consistent performance and high flow rates for professional water management. It is a reliable solution built for long-lasting durability in both drainage and irrigation system applications.

Key Performance Metrics

Performance Highlights

103

Model Series

Application Details

Primary Applications

Agriculture, Irrigation, Water Drainage, Water Management

Design Features

Construction Features

- Robust structural build
- Optimized impeller design
- High flow rate capability
- Long-lasting durability
