

Agricultural Water Pump for Irrigation and Drainage

This water pump is designed for agricultural machinery, specifically for drainage and irrigation purposes. The pump is suitable for transferring water in irrigation systems or for drainage applications in agricultural settings.

Product Overview

High-Efficiency Agricultural Water Pump

This industrial-grade water pump is engineered for demanding agricultural environments, serving as a reliable solution for both large-scale irrigation and drainage tasks. Constructed with a robust cast metal housing, the unit offers excellent corrosion resistance and structural integrity for prolonged outdoor use. The integrated design features reinforced structural ribs and a secure flanged mounting base, ensuring stability and performance when attached to irrigation or drainage machinery.

Technical Specifications

Housing Material	Cast metal (aluminum alloy)
Mounting Style	Flanged base with multi-bolt configuration

Features

Key Features	Corrosion Resistant, Reinforced Housing, Agricultural Grade, High-Flow Impeller
--------------	---

Application

Applications

- Agricultural irrigation systems
- Water drainage management
- Fluid transfer for machinery
