

Agricultural Water Pump for Irrigation and Drainage

This water pump is designed for agricultural machinery, specifically for drainage and irrigation applications. It is a key component for maintaining optimal water levels in fields and ensuring efficient water distribution.

Product Overview

Robust Agricultural Water Pump

This water pump is specifically engineered for high-efficiency drainage and irrigation applications in agricultural environments. Featuring a heavy-duty housing and a reliable belt-driven mechanism, it is designed to facilitate consistent water circulation for optimal field maintenance. Its durable build ensures long-term operational stability for intensive agricultural tasks.

Technical Specifications

Primary Applications

- Field Irrigation
- Water Drainage
- Agricultural Machinery Integration

Design Features

Robust Build • Multiple Ports • Pulley Mounted

Drive Type	Belt-driven
Housing Material	Cast Iron, Aluminum
