

Agricultural Water Pump with Flow Meter

This water pump is designed for agricultural drainage and irrigation purposes. It features a metallic housing and brass fittings and is connected to a flow meter for measuring water usage.

Product Overview

High-Efficiency Agricultural Water Pump

This industrial-grade water pump is specifically engineered for robust agricultural drainage and large-scale irrigation tasks. Constructed with a durable metallic housing and precision brass fittings, it ensures longevity and reliability in demanding outdoor environments. The integrated flow meter allows for precise monitoring of water usage, making it an essential tool for efficient resource management.

Technical Specifications

Primary Applications

- Agricultural drainage
- Irrigation systems
- Water usage monitoring

Key Features

Integrated Flow Meter • Corrosion-Resistant Fittings • Industrial Build

Construction Materials

Metallic Housing, Brass Fittings
