

Agricultural Wheel Crane QLY25B

This agricultural wheel crane is designed for lifting and moving heavy objects. It features a wheeled chassis for mobility and a boom with a hook and pulley system.

Product Overview

Agricultural Wheel Crane QLY25B

The QLY25B Wheel Crane is a specialized piece of machinery engineered for lifting and material handling tasks in agricultural and construction environments. Featuring a robust wheeled chassis for enhanced mobility, this crane provides the flexibility needed to navigate varied terrain. Its integrated boom and hook system allow for efficient operation, making it an essential asset for heavy-duty lifting requirements.

Technical Specifications

Model Number	QLY25B
Equipment Type	Wheel Crane
Primary Applications	Agricultural, Construction, Heavy Lifting

Key Features

Mobility

Wheeled Chassis • Mobile

Lifting System

- Extendable Boom
- Hook and Pulley System
