

Agricultural Wheel Tractor

This agricultural wheel tractor is designed for plowing, tilling, and other farming operations. It features a fully enclosed cabin, large agricultural tires, and a robust frame.

Overview

High-Performance Utility Tractor

This medium-sized agricultural wheel tractor is engineered for demanding farming operations including plowing and tilling. Featuring a fully enclosed cabin for operator comfort and protection, it is built with a robust frame and large tires for superior traction in various field conditions. Its diesel engine provides the consistent power required for versatile agricultural applications, supported by front-mounted weights to ensure optimal stability.
