

Agricultural Wheel Tractor for Farming Operations

This wheel tractor is designed for agricultural applications, featuring a robust diesel engine and manual transmission. It is equipped with a hydraulic lift system and PTO for versatile implement compatibility.

Overview

Versatile Agricultural Performance

The TS504 is a robust wheel tractor engineered specifically for demanding agricultural environments. Featuring a powerful diesel engine and a manual transmission, it is designed to handle tasks such as plowing, tilling, and planting with ease. The tractor integrates a hydraulic lift system and PTO, providing seamless compatibility with a wide range of farming implements for maximum productivity.

Key Features

Operational Capabilities

Plowing, Tilling, Planting, Implement Compatible
