

# Agricultural Wheel Tractor for Plowing and Planting

This wheel tractor is designed for agricultural use, featuring a robust chassis and large tires for traction. Equipped with a diesel engine and hydraulic system, it efficiently performs field operations like plowing, planting, and harvesting with various attachments.

## Overview

### Versatile Agricultural Power

This robust wheel tractor is engineered specifically for demanding agricultural environments. Featuring a powerful diesel engine and high-traction tires, it provides the reliability needed for essential field operations including plowing, planting, and harvesting. Its integrated hydraulic system ensures seamless compatibility with a wide range of farm implements, significantly enhancing operational versatility.

## Technical Specifications

Engine Type	Diesel
Attachment Compatibility	Loaders, Mowers, Plows, Planters

## Key Performance Metrics

### Core Operational Capabilities

- Heavy-duty chassis for field durability
- High-traction tire configuration
- Advanced hydraulic system for implements
- Ergonomic operator control station
