

Agricultural Wheel Tractor for Plowing and Tilling

This wheel tractor is designed for agricultural applications such as plowing and tilling. Equipped with a diesel engine and robust transmission, it delivers reliable power and performance.

Product Overview

Robust Agricultural Performance

The TS504 wheel tractor is a specialized machine engineered for demanding agricultural tasks such as plowing and tilling. It features a reliable diesel engine and a high-performance transmission system designed to provide consistent power across various soil conditions. Built with durability in mind, this tractor combines heavy-duty traction capabilities with an ergonomic operator environment to ensure productivity during extended field operations.

Maintenance

Easy Maintenance • High Durability

Performance Metrics

Primary Applications

Plowing, Tilling, Agricultural Field Work

Technical Specifications

Traction System

- Heavy-duty tires
- Optimized terrain performance
- High-traction design

Engine Type

Diesel

Operator Environment

Operator Interface

- Standard steering wheel
- Gear selection levers
- Implement control system
- Comfort-focused seating
