

Agricultural Wheel Tractor with Enclosed Cabin

This red and black wheel tractor is engineered for agricultural applications. It features a fully enclosed cabin, large lugged tires for traction, and a powerful engine.

Overview

Professional Agricultural Performance

The KM800 wheel tractor is engineered for high-demand agricultural operations requiring reliability and operator comfort. Featuring a fully enclosed cabin, it protects the operator during long hours in the field while providing optimal visibility. The robust design, combined with large lugged tires, ensures superior traction and performance across diverse terrain.
