

Agricultural Wheeled Tractor for Field Work

This wheeled tractor is designed for agricultural applications, featuring a robust chassis and durable tires. Its compact design and maneuverability make it ideal for fieldwork.

Product Overview

Professional Agricultural Utility

This wheeled tractor is engineered specifically for diverse agricultural fieldwork, offering a robust chassis and high-performance capabilities. Its compact design ensures superior maneuverability across various terrains, making it a versatile asset for daily operations. Equipped with an operator canopy and intuitive controls, it balances power with user comfort for tasks ranging from plowing and tilling to harvesting.

Performance Metrics

Supported Operations

Plowing, Tilling, Planting, Harvesting

Technical Features

Design Features

- Robust heavy-duty chassis
- High-traction agricultural tires
- Operator protective canopy
- Front and rear implement controls

Markings

AMEC
