Product Overview

Intelligent Humidification Solution

The SH1012 is a professional-grade AI intelligent humidifier designed for high-efficiency moisture distribution. Featuring advanced hybrid technology and double-sterilization processes, it provides a safe, healthy, and comfortable environment for spaces ranging from 10 to 100 square meters. Its flexible dual-design allows for both floor and desktop configurations, making it a versatile choice for diverse commercial or domestic requirements.

Technical Specifications

Product: Hybrid Top Filling Humidifier
Product Model: SH1012
Product Size: 305*185*670mm
Product Package size: 340*220*385mm
Rated Power : 480W
Rated Voltage: 100-120V or 220-240V
Max. Mist Output: 1000ml/h
Water Tank Capacity: 8.0L

Product Feature:
1.Unique double valve top filling patent design ,convenient , safe, watertight.
2.Unique hybrid technology, large mist output, rapid diffusion, have a better humidification effect.
3.Floor type and desktop type combination design make two height, meet different requirements.
4.Small package size make transportation cost is low. Convenient to use and storage.

Mist Output

1000 ml/h

Max Mist Output

Dimensions

Metric	Size (mm)
Product Size	305 x 185 x 670
Package Size	340 x 220 x 385

Water Tank Capacity

8 L

Rated Power

480 W

Supported Voltage

100-120V, 220-240V

Features

Core Features

- AI Intelligent space identification (10-100m²)
- Dual Sterilization (UV and 100)
- Double valve top-filling design
- Floor and desktop height options
- Warm mist output (50-65)
