

# Air Blow Gun with PU Spiral Hose

This air blow gun is equipped with a PU spiral hose for efficient cleaning and drying. Its ergonomic handle ensures comfortable operation and precise control.

## Product Overview

### Precision Air Blowing Solution

This air blow gun with PU spiral hose is engineered for fine blowing applications requiring high precision and control. Featuring a specially designed nozzle that generates a low-noise, soft air jet, it is an ideal tool for precision engineering and the plastic industry. The included durable PU spiral hose offers excellent flexibility and reach for general trade use.

## Technical Specifications

### Working Pressure

**90 psi**  
Working Pressure

### Hose Working Length

2 m

### Air Inlet Size

1/4 inch

## Features

### Key Features

- Low-noise soft air jet
- High precision control
- Kink-resistant PU spiral hose
- Ergonomic handle design

### Recommended Applications

Precision Engineering, Plastic Industry, General Trade Use, Workshop Maintenance
