

# Air Blower 250W

This air blower is designed for various applications requiring efficient air movement. It operates at 220V-240V, 50Hz/60Hz, with a power consumption of 250W and is suitable for continuous operation.

## Product Overview

### Professional Air Blower Solution

The 250W Air Blower is a high-performance, robust unit engineered for consistent operation in demanding professional environments. Designed with a continuous duty cycle rating, it ensures reliable airflow for sustained industrial or commercial applications. With its compact form factor and adherence to strict safety standards, this blower provides a durable solution for technical systems requiring steady pressure and flow.

## Technical Specifications

### Rated Current

**1.1 A**

Rated Current

Power Consumption	250 W
Voltage Range	220V-240V
Frequency	50Hz/60Hz
Duty Cycle	S1 Continuous
Insulation Class	CL.B

## Compliance and Identification

### Model Specifications

Property	Value
Model Name	BP250
Certifications	CE
