

Air Brake Chamber with Push Rod

This heavy-duty brake chamber is designed for air brake systems. It features pneumatic fittings for connection to air lines, enabling the application of braking force.

Product Overview

Heavy-Duty Air Brake Chamber

This air brake chamber with integrated push rod is engineered for reliable performance in heavy-duty automotive air brake systems. Constructed with a robust metal housing, it is designed to withstand the rigorous demands of commercial vehicle braking. The unit features standard pneumatic fittings for efficient air line connection and consistent force delivery.

Technical Specifications

Key Features

- Integrated push rod assembly
- Standard pneumatic air line fittings
- High-durability metal housing
- Designed for consistent braking force

Component Type	Air Brake Chamber with Push Rod
Construction Material	Heavy-duty metal
Application Suitability	Commercial Vehicles, Heavy-Duty Trucks, Air Brake Systems
