

# Air Brake Relay Valve for Truck and Bus

This air brake relay valve is designed for use in truck and bus air brake systems. It controls air pressure to the brakes, providing efficient and safe braking.

## Product Overview

### High-Performance Air Brake Relay Valve

This air brake relay valve is precision-engineered for heavy-duty truck and bus air brake systems, ensuring reliable and efficient braking performance. Constructed from durable materials such as aluminum or cast iron, it offers excellent corrosion resistance and an extended service life. The compact, high-efficiency design allows for versatile installation across various vehicle configurations while consistently meeting rigorous safety and performance standards.

## Technical Specifications

### Vehicle Compatibility

- Heavy-duty trucks
- Buses

### Key Features

Corrosion Resistant • Compact Design • High Durability

### Body Material

Aluminum, Cast Iron

### Maintenance

Includes a test port with a protective green cap for simplified system diagnostics.
