

# Air Caster Rigging System for Heavy Equipment

Air caster systems can move your heavy equipment easier and faster, even your equipment is awkward, oversized and uneven. The system includes air casters, air hoses, a control box, and load platforms for versatile load handling.

## Product Overview

### Efficient Heavy Load Handling

The Air Caster Rigging System is designed to streamline the movement of heavy, awkward, and oversized equipment. By utilizing compressed air as the primary power source, this system eliminates the need for external fuel or electricity, significantly reducing operational costs. It provides a versatile solution for transporting uneven or challenging loads with ease and precision.

## Technical Specifications

### Included Components

- Air Caster Modules
- Control Box
- Air Supply Hoses
- Load Platforms

### Key Benefits

Time Saving • Cost Effective • Compressed Air Powered

### Power Source

Compressed Air

### Load Handling

Heavy Equipment, Oversized Loads, Uneven Loads, Awkward Shapes
