

Air Circuit Breaker for Power Distribution

This air circuit breaker is designed for electrical generating systems. It is suitable for a variety of industrial applications.

Overview

High-Capacity Air Circuit Breaker

This air circuit breaker is engineered for robust electrical generating systems and power distribution networks. Designed to handle demanding industrial environments, it provides reliable protection across a wide amperage range. Its construction ensures safety and efficiency in critical power infrastructure applications.

Technical Specifications

Minimum Rated Current	800 A
Maximum Rated Current	6300 A
Suitable Applications	Industrial, Electrical Generating Systems, Power Distribution

Key Metrics

Operating Range

800 A

Min Current

6300 A
