Product Overview

High-Efficiency Air Circulation

The SK-CF01 air circulator fan is engineered to provide powerful and efficient air movement, utilizing aerodynamic blades for quiet operation. Its versatile design features an adjustable tilt head for precise directional control and a multi-speed control panel for customized comfort. Compact and durable, this fan is an ideal solution for maintaining consistent airflow in homes, offices, and small professional spaces.

Technical Specifications

Blade Configuration	Three-blade aerodynamic system
Control Interface	Integrated push-button control panel
Tilt Capability	Yes

Design & Build

Recommended Environments

- Homes
- Offices
- Small Spaces

Key Features	Adjustable Tilt, Quiet Operation, Stable Base, Safety Grill
