

# Air Circulator Motor for Fans and Ventilation

This air circulator motor is designed for use in various ventilation and air circulation applications. It features robust construction for durability and reliable performance.

## Product Overview

### High-Performance Air Circulator Motor

This air circulator motor is engineered for reliable performance in ventilation and air circulation systems. Designed for seamless integration into household electrical appliances like electric fans and exhaust units, it features a robust build for long-term durability. The unit comes equipped with a mounting bracket for secure installation and a convenient pull chain for manual operation, ensuring efficient airflow control.

## Technical Specifications

Rated Horsepower	0.033 HP
Voltage	115 V
Rated Current	0.74 A
RPM	1550 RPM
Frequency	60 Hz
Insulation Class	Class B

## Key Features

### Features

- Includes mounting bracket
- Manual pull chain operation
- Compact design
- Robust construction

### Safety Certifications

Electrically Certified

## Performance Metrics
