

# Air Compressor Microcomputer Control System

This microcomputer control system is designed for air compressors. It features an ON/OFF indicator, loading/unloading control, and a digital display.

## Overview

### Advanced Compressor Control

This microcomputer control system is designed to provide precise management for air compressor units. It features a comprehensive digital interface allowing for easy monitoring of operational status, including loading and unloading cycles. With intuitive parameter adjustment controls, it ensures efficient system configuration and reliable performance for industrial applications.

## Technical Specifications

Model Number	EAS-100-500
System Type	Micro-computer Control System

## Key Features

### Interface Controls

- SET Button
- UP Navigation
- DOWN Navigation
- RIGHT Navigation
- RESET Function

Operational Indicators	ON/OFF Status, Loading Control, Unloading Control
------------------------	---
