

# Air Compressor Microcomputer Controller

This micro-computer control system is designed for air compressors. It features a control panel with indicators and buttons for precise control and monitoring.

## Overview

### Intelligent Compressor Control

The EAS-100-500 is a specialized micro-computer control system engineered for precise air compressor management. It provides a comprehensive interface for monitoring system status, including real-time loading and unloading operations. Designed for reliability, this controller simplifies compressor operation through an intuitive panel layout.

## Technical Specifications

Model Number	EAS-100-500
System Type	Micro-computer control system

## Interface & Controls

### Control Functions

- SET
- DOWN
- UP
- RIGHT
- RESET

Status Indicators	ON, OFF, Loading, Unloading
-------------------	-----------------------------
