

Air Conditioner Fan Motor

These motors are designed for air conditioners and ventilation equipment. They efficiently drive fans, compressors, and other components within these systems.

Overview

Versatile Appliance Motor Solution

This high-quality motor is engineered for a wide range of home appliance applications, offering reliable performance and consistent operation. Designed with over 20 years of manufacturing expertise, it provides a cost-effective solution for air conditioning, ventilation, and cooling systems. Its compact and efficient design makes it an ideal component for various fan and motor-driven household devices.

Applications

Compatible Applications

- Air Conditioner
- Washing Machine
- Spin Motor
- Air Cooler
- Bladeless Fan
- Stand Fan
- Desk Fan
- Ventilator / Exhaust Fan
- Cooker Hood
- Heater Fan

Technical Details

Design Features

Compact Size • Efficient Operation • Reliable Performance

Motor Types

Shaded Pole Motor, Fan Motor
