

Air Conditioner Filter

High-efficiency air conditioner filter designed for removing dust and airborne particles. It features a durable frame and pleated filter media to improve air quality and HVAC system performance.

Product Overview

High-Efficiency Filtration

This high-efficiency air conditioner filter is expertly designed to capture dust, pollen, and various airborne particles, significantly improving indoor air quality. Featuring a robust, durable frame and advanced pleated filter media, it is engineered for an extended service life and consistent performance. Regular replacement of this filter helps maintain optimal HVAC system efficiency and ensures cleaner, healthier air circulation.

Technical Details

Filter Type	Pleated
Filtration Targets	Dust, Pollen, Airborne Particles

Construction

Frame Construction
Durable Frame

Maintenance

Maintenance Recommendation	Regular replacement recommended for optimal filtration and system performance.
