Product Overview

Professional Grade Inlet Valve

The WV-62C is a high-performance inlet valve engineered for seamless integration into various household appliances including air conditioners, washing machines, and dishwashers. Featuring a robust construction, this component is designed to reliably control fluid flow in demanding operational environments. Its versatile design incorporates two outlet ports, providing flexibility for diverse system configurations and plumbing setups.

Technical Specifications

Component Category

Home Appliance Accessory • Inlet Valve

Configuration

Dual Outlet

Suitable Applications

Air Conditioners, Washing Machines, Dishwashers, Ventilation Equipment
