

Air Conditioner Mounting Bracket

This is a cast metal bracket used in air conditioning systems. It features multiple mounting points and a square base for secure installation.

Product Overview

Robust Air Conditioning Support

This cast metal bracket is engineered as a critical structural component for air conditioning systems. Designed with precision, it features multiple mounting points including circular protrusions and a square base to ensure secure installation. Its specialized shape provides the necessary support and stability required for heavy-duty HVAC applications.

Technical Details

Mounting Points

- Circular protrusions
- Square base interface

Application

Air Conditioning Systems • Structural Support

Material

Cast Metal

Part Identification

SOMZ 130422
