

Air Conditioner Replacement Filter

This is a replacement air conditioner filter designed to improve air quality and system efficiency. The filter is constructed with a pleated design to maximize surface area for capturing dust, pollen, pet dander, and other airborne particles.

Product Overview

High-Efficiency Air Filtration

This replacement air conditioner filter is engineered to significantly enhance indoor air quality and maintain system efficiency. Featuring a specialized pleated design, it maximizes surface area to effectively capture common airborne contaminants such as dust, pollen, and pet dander. Constructed from durable, moisture-resistant synthetic materials, this filter prevents microbial growth while ensuring a long service life for your HVAC equipment.

Design & Construction

Design Type	Pleated
Material	Durable Synthetic
Key Features	Moisture Resistant, Microbial Growth Prevention, Easy Installation, Standardized Dimensions

Performance

Captures

- Dust
- Pollen
- Pet Dander
- Airborne Particles

Efficiency Standard

MERV Rated
