

# Air Conditioner Roller Filter

The air conditioner roller filter removes dust, pollen, and other airborne particles from circulating air. Its cylindrical design features permeable sections that trap contaminants, ensuring efficient air purification and maintaining optimal unit performance.

## Product Overview

### Air Conditioner Roller Filter

The air conditioner roller filter is a specialized component engineered to effectively remove dust, pollen, and other airborne particles from the air circulating through your HVAC system. Featuring a distinctive cylindrical shape with evenly spaced, permeable sections, it is designed to trap contaminants while maintaining optimal airflow. Constructed from durable, washable materials, this filter helps ensure efficient air purification and sustains the long-term performance of your air conditioning unit.

## Technical Specifications

Design	Cylindrical
Material Type	Durable, Washable

## Maintenance

Maintenance	Regular cleaning or replacement is recommended to prevent clogging and maintain air quality.
-------------	--

## Functionality

### Key Functions

- Remove dust
- Remove pollen
- Trap airborne particles
- Maintain optimal unit performance
