

Air Conditioner System Cleaner

This air conditioner cleaner is designed to effectively clean and disinfect air conditioning systems. It removes dust, dirt, and other contaminants, improving air quality and system performance.

Product Overview

Professional Air Conditioner Cleaner

This specialized air conditioner cleaner is engineered to effectively disinfect and sanitize air conditioning systems. It rapidly removes accumulated dust, dirt, bacteria, and other harmful contaminants, which helps to significantly improve indoor air quality and system performance. Regular application of this treatment maintains optimal cooling efficiency and helps prevent the growth of mold, ultimately extending the operational lifespan of your equipment.

Technical Details

Model Number	K-1002
Net Volume	450 ml

Key Features

Product Status	New Arrival
Key Benefits	Disinfectant, Dust Removal, Bacteria Control, Improved Efficiency, Mold Prevention
