

Air Conditioner Ventilation Fan Blade

Black six-blade fan designed for air conditioners and ventilation equipment. It is constructed from durable plastic material for efficient air circulation and long-lasting performance.

Product Overview

High-Efficiency Ventilation Fan Blade

This black six-blade fan is engineered specifically for air conditioning units and industrial ventilation systems. Constructed from durable, high-quality plastic, it ensures reliable air circulation and extended operational life. This component serves as an ideal spare part for efficient system maintenance and repair.
